## What is Cookies?

A cookie, also known as an HTTP cookie, web cookie, or browser cookie, is a small piece of data sent from a website and stored in a user's web browser while the user is browsing that website. Every time the user loads the website, the browser sends the cookie back to the server to notify the website of the user's previous activity. Cookies were designed to be a reliable mechanism for websites to remember essential information (such as items in a shopping cart) or to record the user's browsing activity (including clicking particular buttons, logging in, or recording which pages were visited by the user as far back as months or years ago).
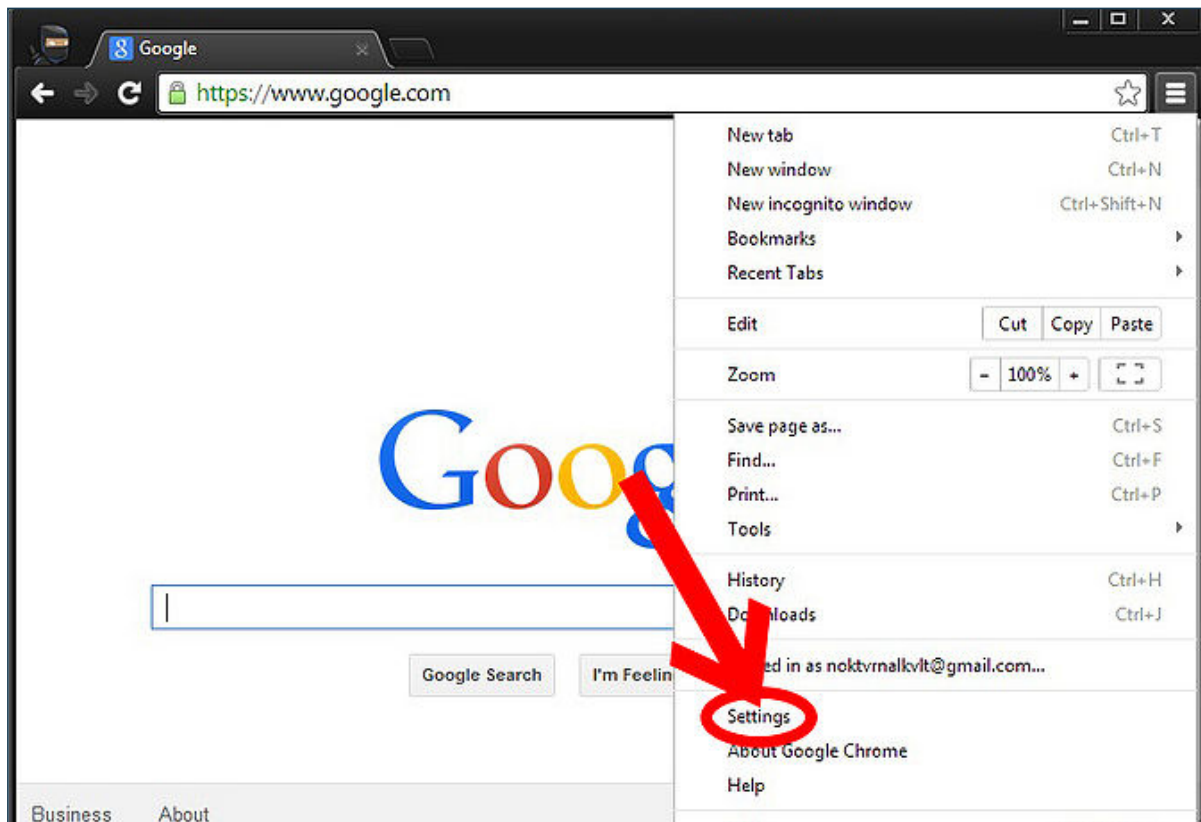

## How to enable Cookies in your web browser?

## A- How to enable Cookies in Google Chrome:

1- Click the **«customize and control»** menu at the top right, as shown below:

2- Click the **«Settings»** controls. A new tab will automatically open, as shown below:

3- Click on **«Show advanced settings....»** near the bottom of the page, as shown below:

4- Click on **«Content settings....»**, as shown below:

5- Under **«Cookies»** make sure that **«Allow local data to be set (recommended)»** is selected, as shown below:

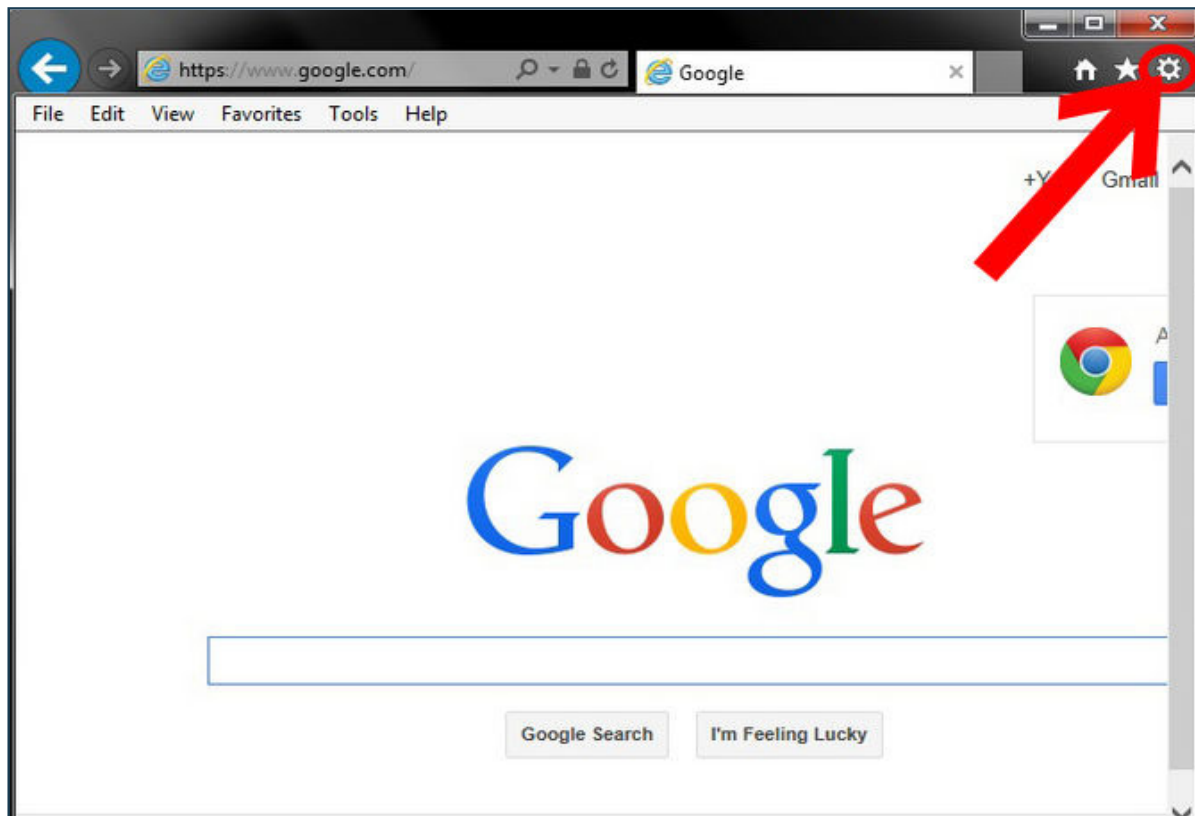

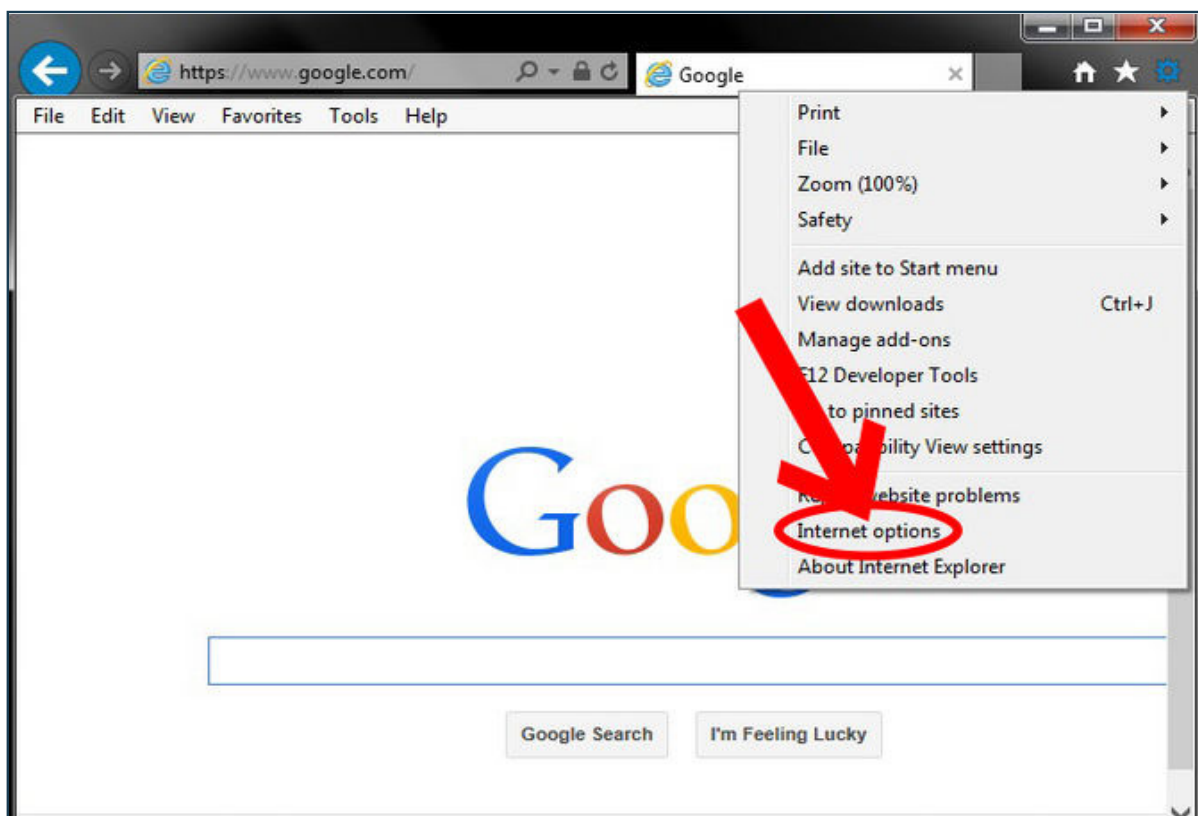

6- Click **«Done»**, as shown below:

## B- How to enable Cookies in Internet Explorer:

1- Click the **«Tools»** menu top right. It will look like a gear icon, as shown below:

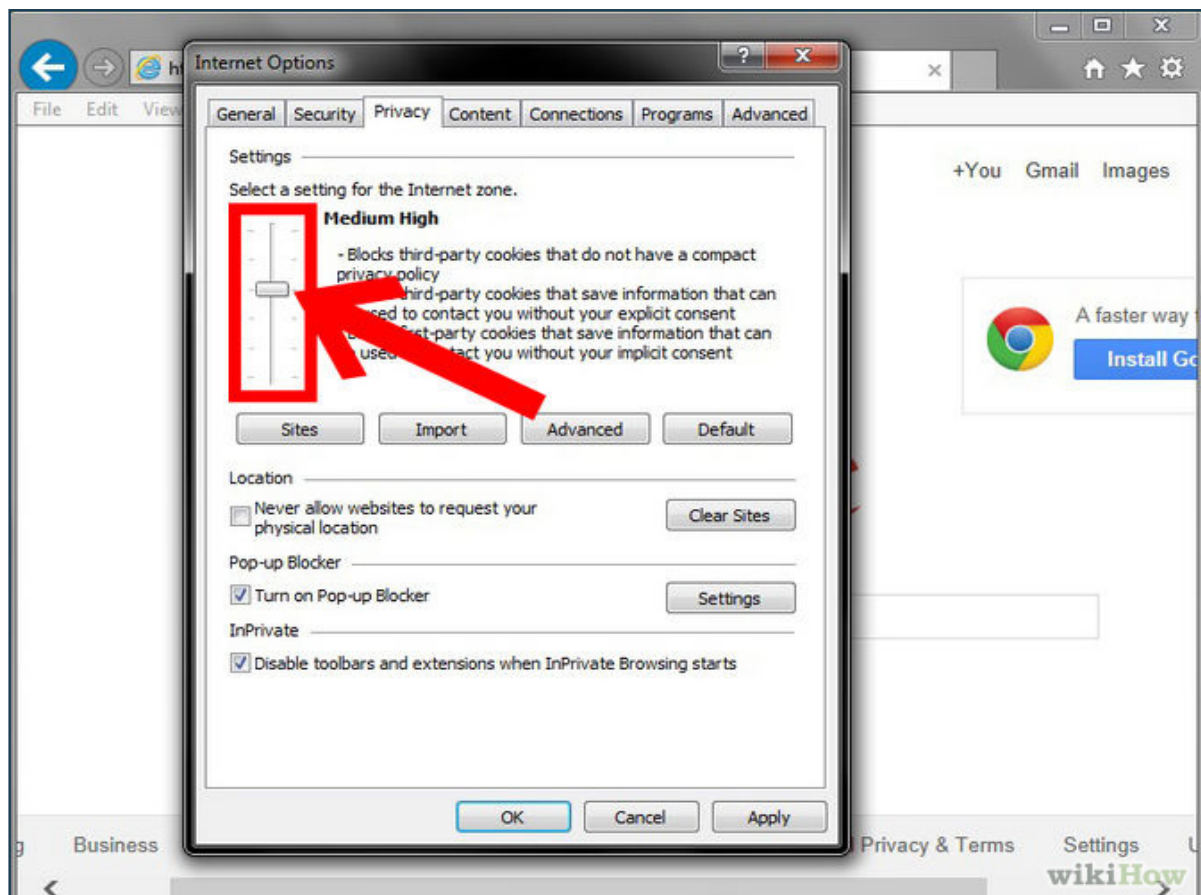

2- Select **«Internet Options»**, as shown below:

3- Click the **«Privacy»** tab, as shown below:

4- Click the **«Default»** button (or manually slide the bar down to **«Medium»**).

• If you want to manually adjust your options, click the **«Advanced»** button to the left of **«Default»**. This will give you more options for customization, as shown below:
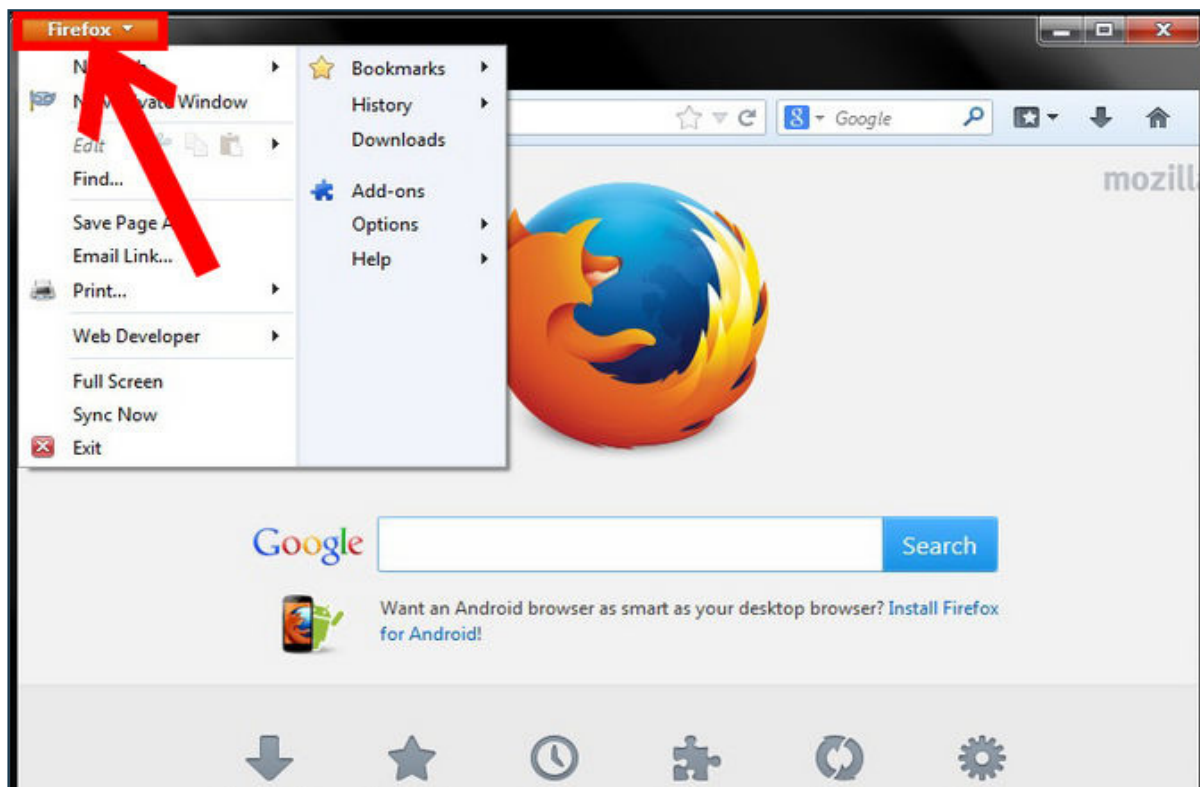

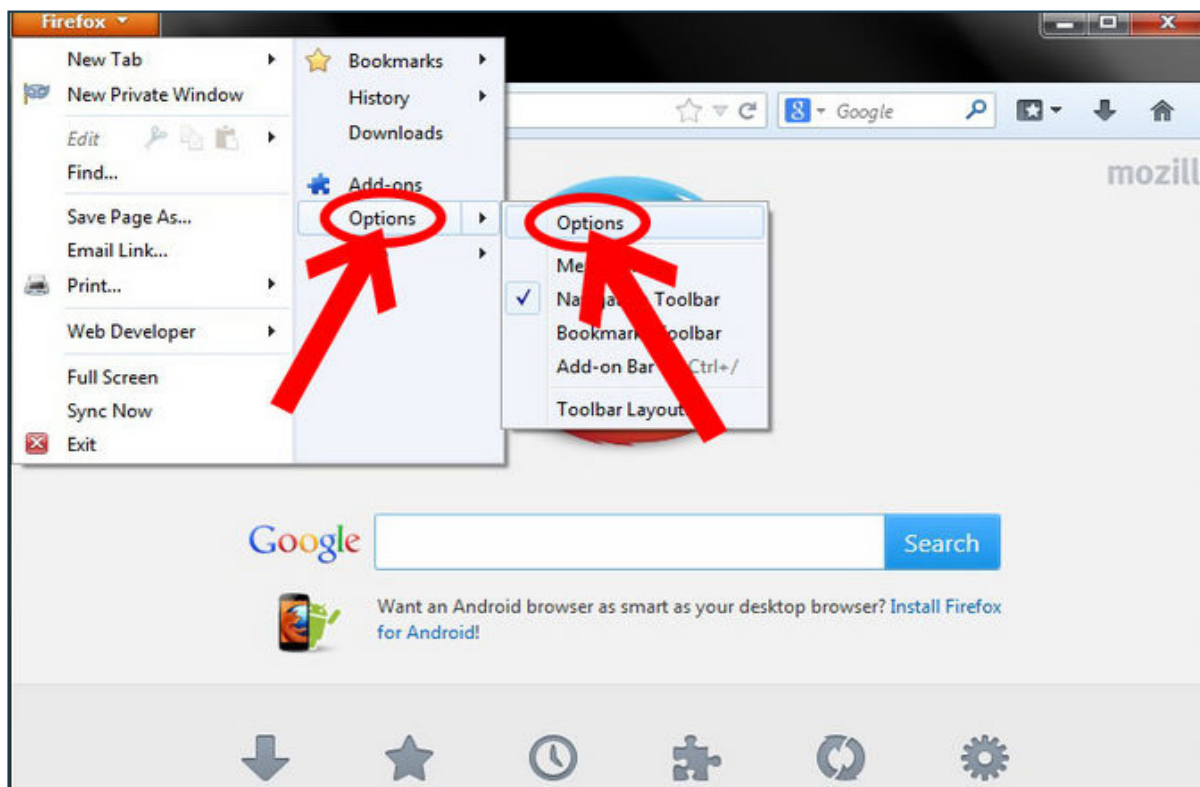

5- Click the **«OK»** button, as shown below:

## C- How to enable Cookies in FireFox:

1- Click the **«Firefox»** menu up top left, as shown below:

2- Select **«Options»**, and then **«Options»** again, as shown below:

3- Cllick the **«Privacy»** tab, as shown below:

4- Click the **«Firefox will...»** dropdown and select **«use custom settings for history»**, as shown below:

5- Select the **«Accept cookies from sites»** checkbox, as shown below:

6- Click the **«OK»** button, as shown below:
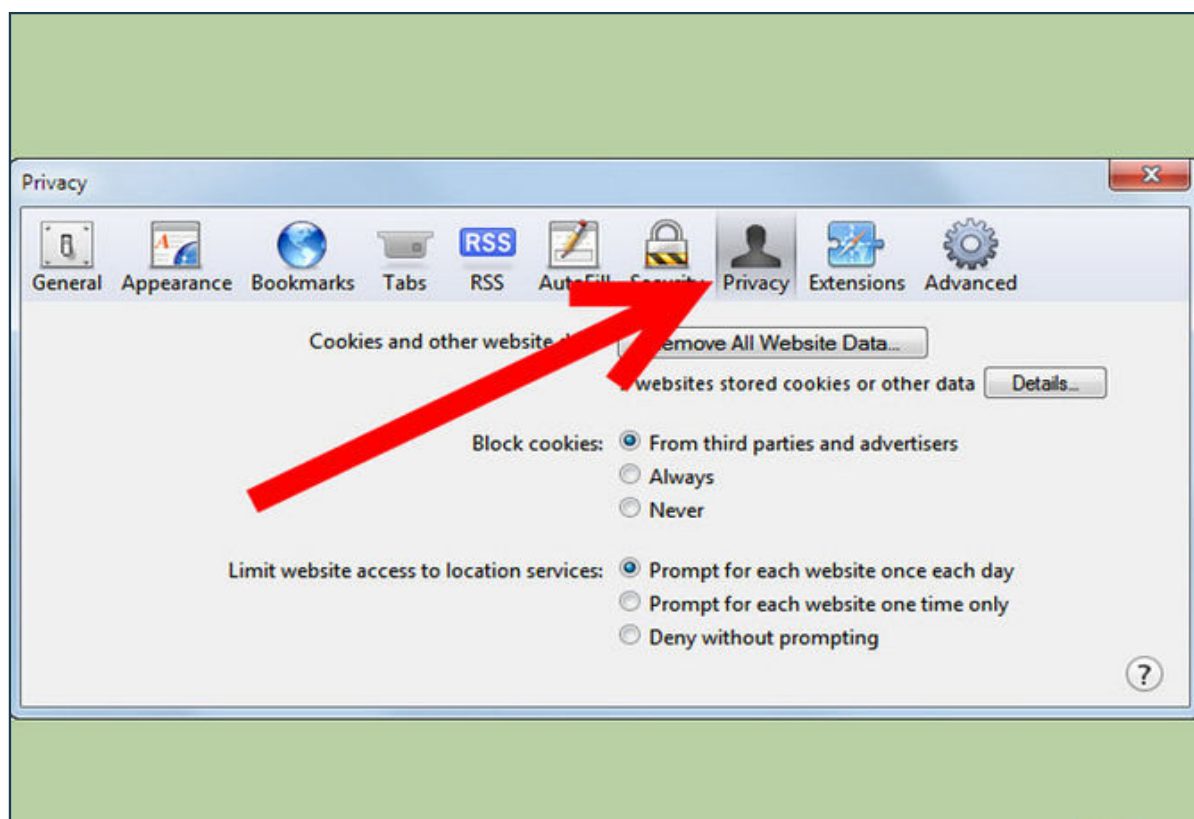

## D- How to enable Cookies in Safari:

1- Click on **«Edit»** in the Menu bar, as shown below:

2- Select **«Preferences»**, as shown below:

3- Click on **«Privacy»** from the **«Preferences»** window, as shown below:

4- Select **«Never»** within the section labeled **«Block cookies»**. Select **«From third parties and advertisers»** to prevent these types of parties from having access to your personal data and preferences, as shown below:
